

ACCELERATE CLEANTECH INVESTMENT AND IMPACT TODAY.

Pick your reasons for investing in cleantech: helping transform our economy and creating value, returns and impact all at once; using the power of business and innovation to fight climate change and improve our quality of life; a love of technology and learning; a passion for entrepreneurs and community. **All of the above?**

Capitalism and cleantech investment can be powerful tools for change, in their own right and especially when paired with supportive policy and philanthropy. E8 offers you a like-minded, flexible, expert community for investing in the global cleantech economy, projected to hit \$3.6 trillion by 2030 (McKinsey) and accounting for 3.26M+ jobs in the US (E2).

This time of great change and need makes it all the more important to accelerate investing in cleantech. The pandemic has put climate change in perspective, offering an immediate sense of the systemic threats we face, while also providing proof that we can mobilize quickly for change.

There are extraordinary opportunities to invest in cleantech, from carbon capture to electric vehicles, new battery technologies, agriculture, renewables and more, in almost every sector. E8 gives you several ways to start, building on more than 15 years of experience and greater than \$50M in more than 120 companies, with >\$1B in follow-on investment. Pick one – or all!
